

June 1995
Monthly Summary of Statistics
Queensland

Catalogue No. 1304.3

At the bottom of the page, there are two thick, black, horizontal bars. The top bar is solid black. The bottom bar is also black but has a textured, grainy appearance, possibly due to the scanning process or the original design. Both bars have a slight 3D effect with angled ends, matching the design of the bars at the top.

(a) Imports relate to the State where the import entry was lodged with the Australian Customs Service. Foreign import data are compiled on the Harmonised Commodity Description Coding System (HICDCS), not the Standard International Trade Classification (Revision 3). (b) Excluding non-merchandise trade. (c) These are selected major groups only and therefore do not add to the totals shown. Imports are recorded statistically in the calendar month in which the import entries are both finalised by the Australian Customs Service and passed to the ABS for further processing. (d) Manufactured goods not included in the other selected commodity groups listed in this table.

(a) From June quarter 1989, September quarter 1991 and September quarter 1992, respectively, data are not comparable with those for previous periods as some caravan parks previously classified as short-term were reclassified as long-term. (b) Including both on-site van sites and other powered sites. (c) From September quarter 1992, caravan park sites, etc. permanently reserved but only casually occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Occupancy measures from September quarter 1992 are not therefore comparable with those from previous quarters.

Discovering North Queensland Statistically

North Queensland is an area experiencing significant change. A number of decision makers, either located in the region or making decisions in respect of the region, have commented to the Australian Bureau of Statistics (ABS) about the real difficulties they experience in understanding what data are available on the region to help them in their work.

- In an attempt to address this problem the ABS has produced *Discovering North Queensland Statistically* (1103.3).

Information is presented by subject. Suggestions are included indicating how it can be used to answer questions and assist informed decision-making. Each subject includes information on the data source, their frequency, the data items available, the geographic coverage, the availability of past data and the associated range of products and services. A range of graphs, tables and maps are also included.

The ABS recognises the need for regions experiencing change to have access to timely, quality information on a wide range of social, cultural and economic issues. *Discovering North Queensland Statistically* represents a further effort to raise awareness of existing data sources relating to the North and to provide a more effective statistical service.

This publication confirms a commitment to be accessible to decision makers no matter where they live.

Priced at a low \$10.00, *Discovering North Queensland Statistically* (1103.3) will prove to be a valuable tool to assist you in your work. Purchase your copy today by **completing the order form below.**
